

## **PRESS KIT**

### ***AWENTECH: Company profile***

City : **Brech / Lorient (Brittany)**

Activity: **Designing of fitting parts, foil and rudder blade systems for racing ships.**

Manager: **Bernard Pointet**

#### ***Presentation of the Project's Partner Company:***

Awentech products can be found particularly on boats sailing around the world (Vendée Globe for IMOCA monohulls, round-the-world records for the Ultime class).

The company also designs the mainsail hooks and the headsail systems that equip the same boats.

#### ***Involvement in the project***

Regarding the Solid Sail project, Awentech designs every part connecting the sail and the mast. It includes the rails, the ball bearing travelers, the main halyard hook, the head traveler and the compression carriage.

We have also designed the operating principle of the folding system, which allows the rigid panels to be folded from vertical to horizontal.
