### ***SMM: company presentation***

City: **Lanester (Brittany)**  
Activity: **composite machining,  
modeling and molding**  
Manager: **Olivier Kerdoncuff**

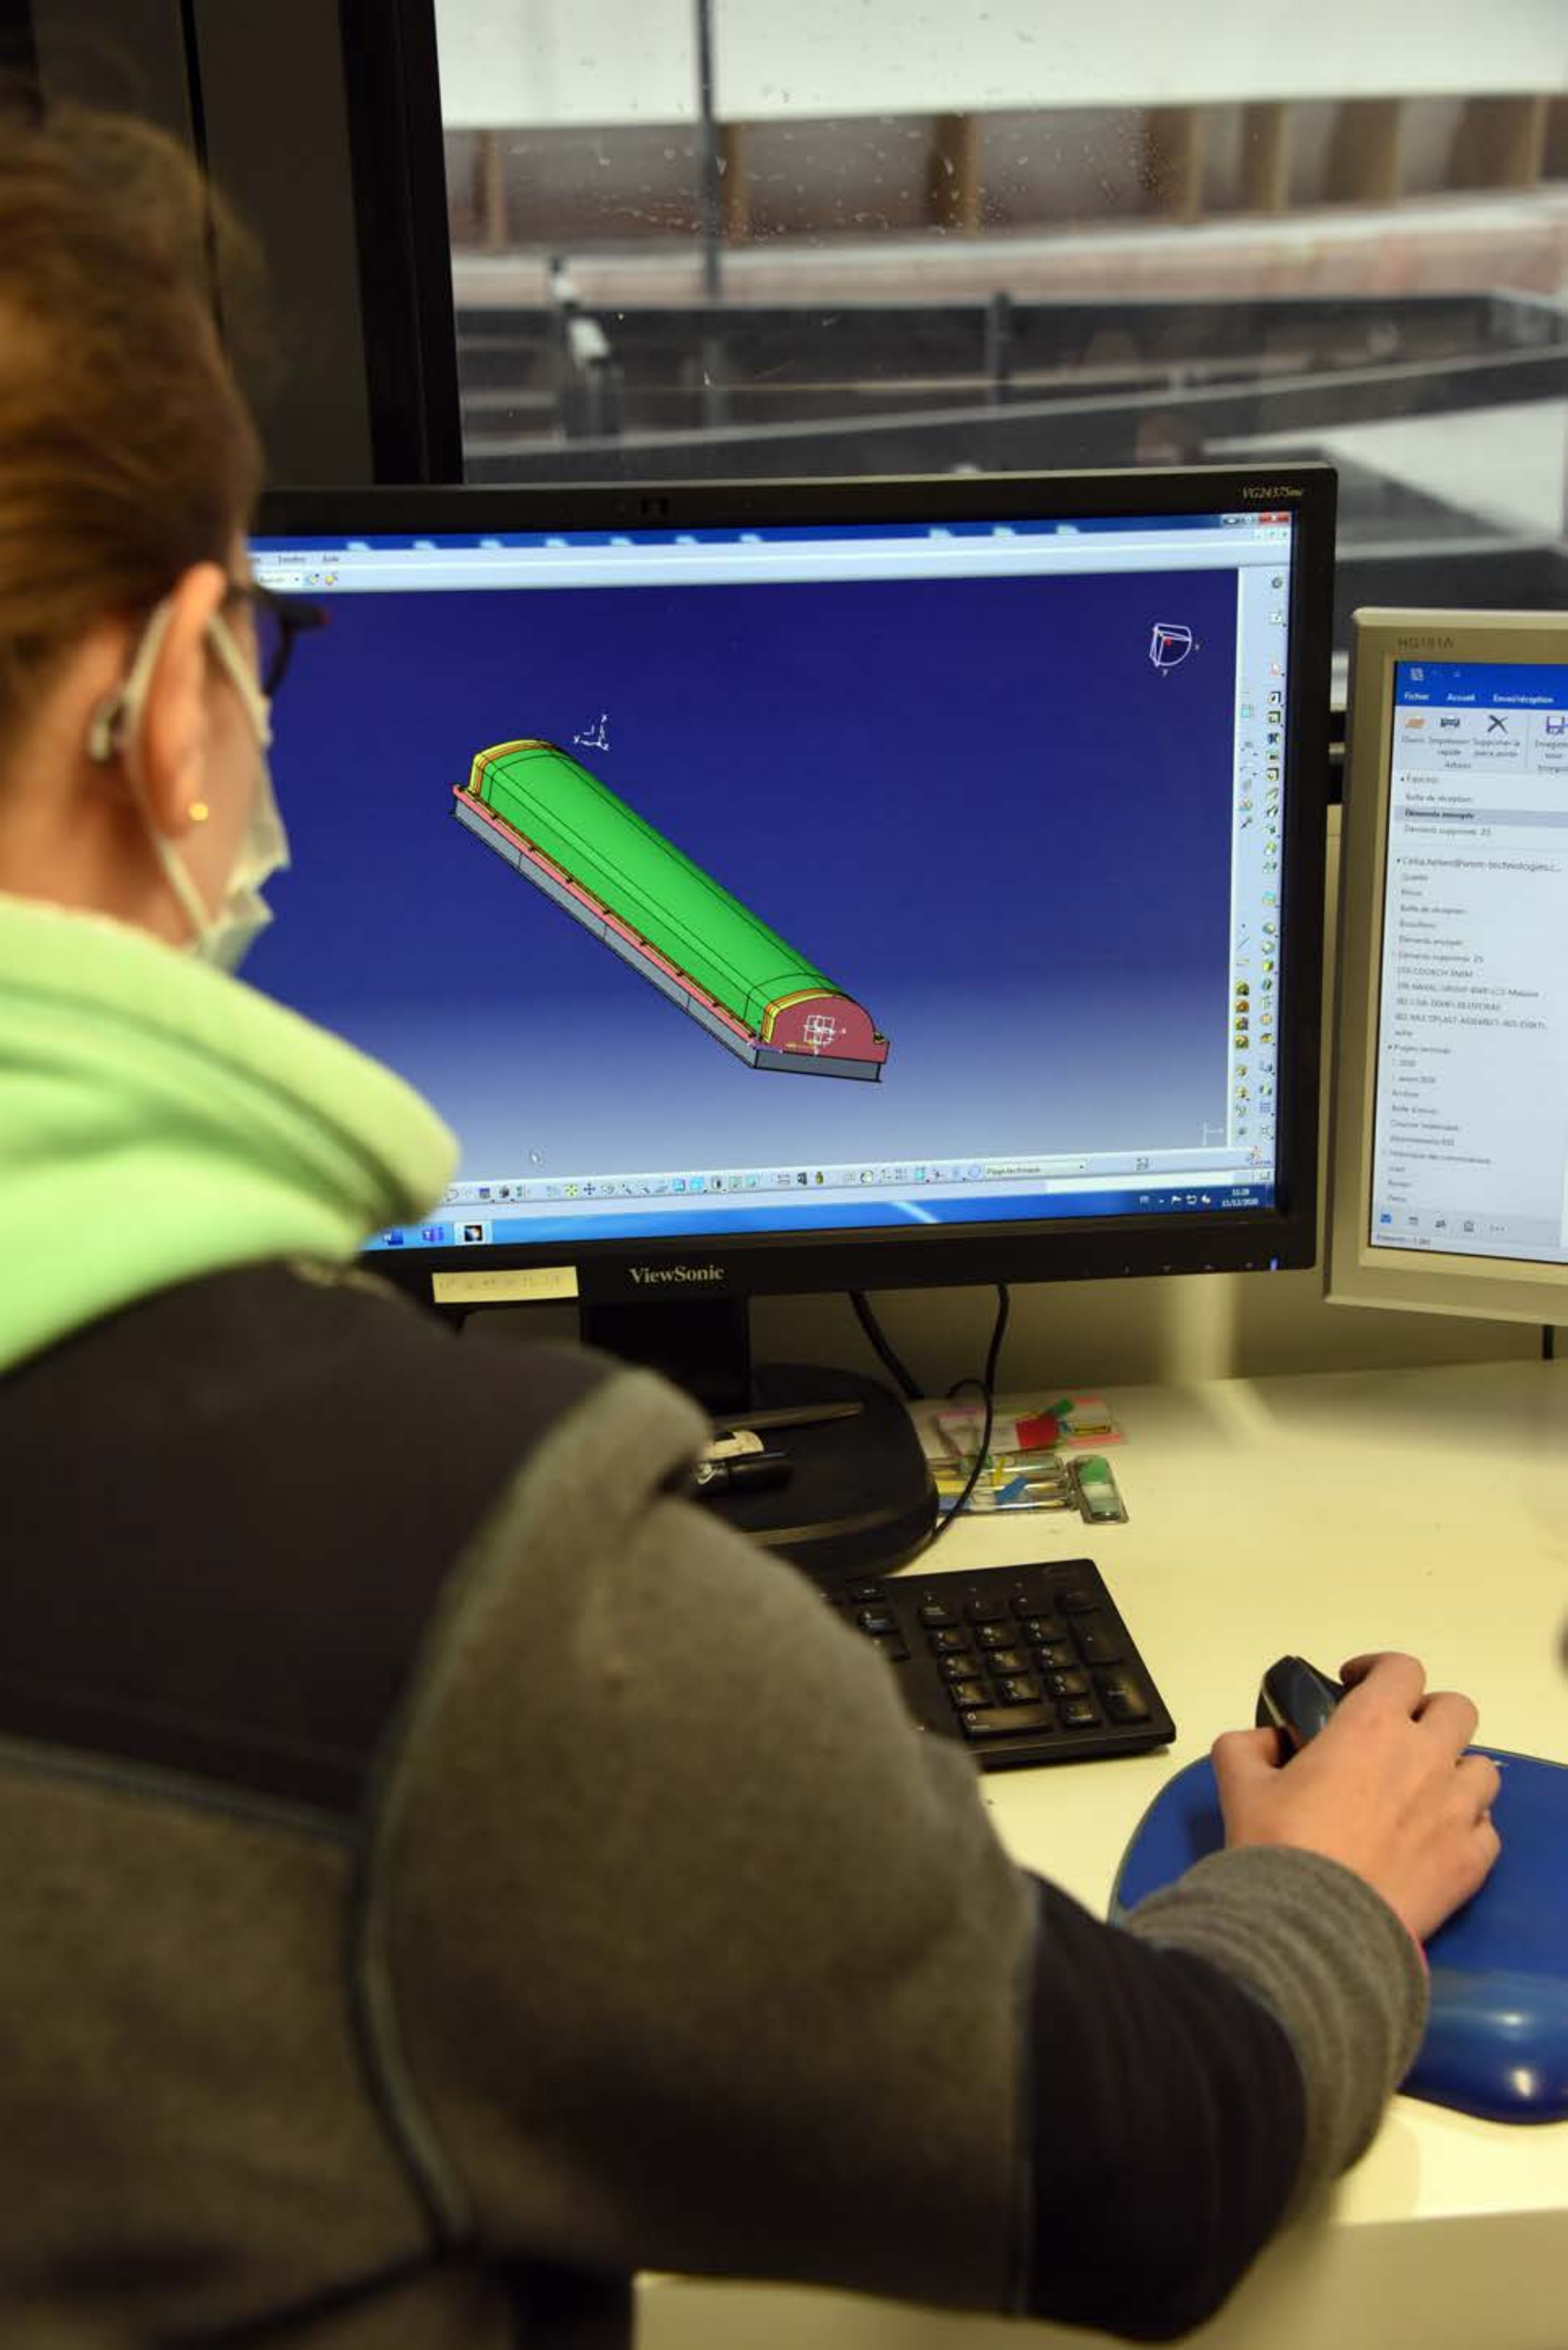

#### ***Presentation of the Project's Partner Company:***

Founded in 1984, SMM is the specialist of composite machining, modeling and molding.

Thanks to its team of 35 employees, SMM internally designs and manufactures molds, models, prototypes, machining or laying templates and composite parts of any size. The quality of the product delivered and the continuous control of the process are guaranteed by our in-house control department. Established in a 6,000 m<sup>2</sup> area (7,175 yd<sup>2</sup>) and equipped with the latest industrial technologies, SMM is prepared to work on large size projects or to tackle several projects simultaneously.

#### ***Involvement in the project***

SMM makes all the necessary tools for the project: tube and sleeve molds, assembly frames and draping tools. Our 100 m (328 ft) long factory allows us to assemble the mast after reception of the subassemblies manufactured by the other companies of the consortium.
